KEY PERSONNEL

Daniel Palmer

A driven individual who has worked with projects of all sizes and scope across the construction industry, and is passionate about the level professionalism in which all works are performed by his organisation.

Daniel prides himself on the delivery of high quality projects, together with Spire personnel are an asset to any building or maintenance project specialising in working on technical projects and challenging 'live environments' where it's essential to undertake a staged-approach to ensure business continuity. His strengths are client and subcontractor engagement, workflow coordination, and the ability to manage large and complex teams.

Daniel's knowledge in the industry is vast with experience within the commercial fit-out, refurbishment industry, and residential. In this time, he has delivered many projects in various sectors including office, health, education, hotels and sports fields.

Jarrold Eastwood

Jarrold started his career working for one of the largest electrical companies in Australia and quickly realised his passion for delivering high quality and cost effective electrical solutions to clients. Jarrold moved on to run his own business and after 5 years merged with Spire Electrical a renowned company which he recognised was committed to the same professionalism and customer-focused service that he has been delivering for over a decade. Jarrold's Quality of and leadership speaks for itself.

SAFETY POLICY

“No task is so important that it compromises the health and safety of any individual”

Spire Electrical is committed to providing a safe work environment for its employees, sub-contractors, clients, consultants and the greater community.

Compliance to the 2011 Workplace Health and Safety Act is maintained at all times and strict adherence to industry leading and best practices guidelines across all activities performed company wide. Safety is valued as the principle driver in the day to day operations of the company and an “inclusion” policy built around a safe work culture employed. All employees are responsible for safety and empowered with the safety of all.

To implement the safety policy Spire Electrical establishes the following safety Critical Control Principles (SCCP):

1. All employees shall be suitably trained, ticketed and competent in all activities
2. Safe Work Procedures are maintained during all works performed
3. “Live” work is to be avoided at all times
4. Spire Electrical Personnel Protective Equipment Requirements are to be complied with as a minimum during all activities
5. Preventative reporting such as potential hazards, near misses or the alike are recorded and amended via onsite Site Specific Safety Management Plans
6. Safety Representatives are nominated for each project team working with clients in delivering a “zero harm environment”

ENVIRONMENTAL POLICY

Spire Electrical is committed to minimising its environmental impact understanding that a responsible business is a sustainable business.

Through innovation and application of industry leading practices whilst employing modern technologies Spire Electrical is proud to steer its clients to design a sustainable, high quality built environment with minimal impact to the environment through the asset life cycle.

Spire Electrical achieves its environmental performance through the following initiatives:

1. Continual improvement of environmental performance of activities, products and services through clear objectives, targets and programmes
2. Enhancing employee understanding of environmental sustainability, through stimulating cultural change
3. Complying with relevant legislation and requirements and regularly evaluating this compliance
4. Engaging our supply chain in improving their environmental performance and responsible sourcing

QUALITY APPROACH

Spire Electrical has become renowned for a smart and robust project management approach delivering cost effective projects on time, every time to budget.

“Through highly experienced site teams Spire Electrical achieves quality outcomes without compromise”

To maintain the highest degree of quality across the board Spire Electrical adheres to the following core quality principles (CQP):

1. Implementation of a Quality Management System
2. Measure project performance on Key Quality Indicators (KQI) and client satisfaction
3. Maintain management accountability for achieving quality outcomes
4. Empowering employees to challenge the status quo and participate in continuous improvement of the Integrated Quality Management System (IQMS).
